HALDORÁDÓ stands its ground even in a changing world!

HALDORÁDÓ, together with the sub-brands we distribute, offers complete solutions for a wide range of fishing methods, providing an increasingly solid foundation in today's rapidly changing world. Our main brand remains HALDORÁDÓ, the brand of feeder, big carp and catfish baits – groundbaits, boilies, flavours and useful accessories.

By Döme is the brand of tools developed for feeder fishing – rods, reels and many useful accessories. **BLACK EDITION** is a sub-brand of high-quality equipment developed for big carp fishing. And finally, there is **KAIWO**, an independent brand and rod factory, ranked among the best fishing rod manufacturers in China, producing exclusively high-quality fishing rods. In recognition of our successful work, in 2025 we received exclusive distribution rights for the whole of Europe. The four strong brands, their popular products and the continuously arriving new developments give us strength and confidence for 2026 as well. Our customers can be sure that from the simplest small accessories to the most expensive fishing rods, all our products are thoroughly tested and proven, fully meeting European demands – reliable products that simply need to be used.

We wish everyone a successful and productive fishing year!

BLACK EDITION KAIWO LR boilie rods

**NEW
2026**

A unique long-distance casting rod family made from the finest materials

One of the greatest challenges of modern carp fishing is long-distance, accurate casting. This requires a rod that not only delivers power and stiffness, but can also be precisely controlled throughout the entire casting process. This fishing rod is manufactured in China, at the renowned Kaiwo rod factory, using state-of-the-art production technology and world-class materials. This rod features long-distance casting performance that is unique within its category.

Fishing tackle

By Döme KAIWO feeder rods

NEW
2026

Kaiwo's rod manufacturing technology, combined with our experience and expectations, results in special feeder rods with outstanding performance characteristics. The Long Cast versions are designed for long-distance fishing and offer better casting performance than ever before. The EXH versions have been optimized specifically for river fishing. Their extreme load capacity not only allows casting larger and heavier weights, but also represents a major step forward in confident, controlled casting.

Tackle boxes, rig storage boxes

**NEW
2026**

Maximized storage capacity and practicality in a compact size

The members of the new tackle box product range make it easier to store and organize small accessories, as well as to transport pre-tied hook rigs. These boxes primarily offer clever solutions for carp anglers and those using feeder techniques; they are made of durable plastic and fitted with strong clasps to ensure a long service life.

Tungsten terminal tackle components

**NEW
2026**

The most important feature of the tungsten small accessories is that they are made of a flexible material weighted with tungsten particles. These very important small accessories can be used both to optimise bait presentation and as terminal tackle elements, while hook kickers can even ensure proper hooking performance.

PVA Bag accessories

**NEW
2026**

The PVA Bag method is a popular carp fishing technique. Its essence is that attractant materials can be delivered in a concentrated form into the water using dissolving bags. High-quality PVA (polyvinyl alcohol) bags and mesh are essential for this method. These, along with all the necessary accessories for filling, can be found in the HALDORÁDÓ product range.

An essential part of modern carp fishing

Leads

**NEW
2026**

One of the basic requirements of bottom-fishing methods is the use of properly designed, high-quality lead weights.

The HALDORÁDÓ range includes everything from weights required for the increasingly popular PVA bag method to general-purpose leads, ensuring that every need is covered.

Essential components of modern bottom fishing

Haldorádó Floats

**NEW
2026**

The Haldorádó Ni-LED is a premium-quality illuminated float available in 4 sizes, developed specifically to meet the needs of night fishing.

Compared to floats that use disposable light sticks, it offers several advantages. While a glow stick can typically be used for only one night, this illuminated float provides at least 40 hours of light with a single battery.

Traditional fishing method in a modern form

Fish Protection Equipment

**NEW
2026**

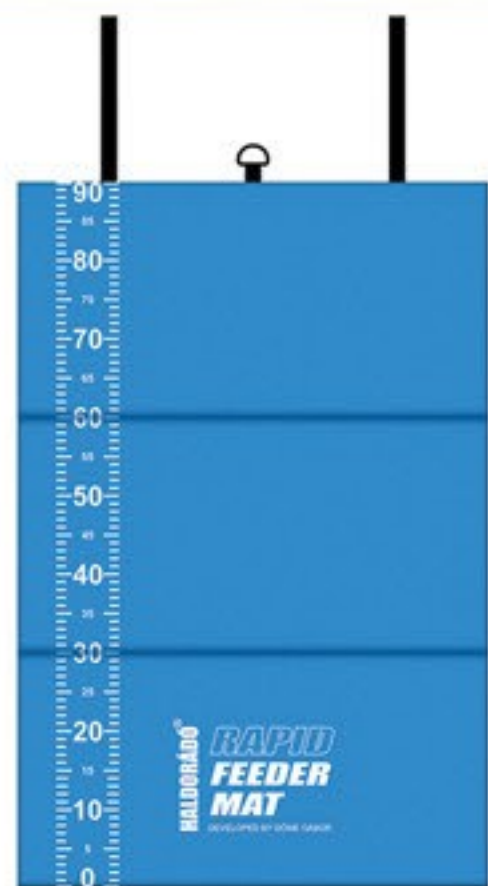

Cultured handling of fish is nowadays a basic requirement, no matter where we fish. The basis of this is that we place large-bodied fish on a mat or cradle where they cannot injure themselves and cannot jump out from it. In this category you will find fish protection tools that should not be missing from the gear of any conscientious angler.

Protect fish – it's in your interest!

Catfish Bait Boilie 24 and 30 mm

performance in catfish fishing
Expert aroma, without compromise

Developed for maximum

Large-sized Catfish Bait Boilies, specially developed for targeting catfish, are designed to withstand long periods in the water and resist attacks from small fish. In terms of ingredients, they are identical to the pellets found within the same product family, however these boilies received special binding agents, ensuring a minimum dissolution time of 24 hours, which can even extend up to 48 hours.

Catfish Bait Pellet 24 and 28 mm

Catfish Bait Pellets, specially developed in large sizes for catfish angling, work extremely effectively in water. Their action is very fast, as fish oil and numerous valuable attractants are continuously released, instantly drawing the attention of catfish. They remain effective in the water for a minimum of 5–7 hours and up to 10 hours, while the outer layer of the pellets gradually softens and dissolves, but the inner core stays hard. This bait material dissolves layer by layer, ensuring a constant feeding attraction.

Catfish Bait Hook Pellet 24 and 28 mm

The Catfish Bait Hook Pellet is fully identical to the Catfish Bait Pellets available in larger pack sizes. The only difference is that the pellets intended for hair rig mounting are equipped with a hole that helps baiting. Their use is especially recommended when these highly effective pellets are also used for feeding.

Special hole to help catfish baiting!

Catfish Bait Pop Up Bloody

The large-sized Catfish Pop Up Bloody baits, developed specifically for attracting catfish, are characterized by extremely strong buoyancy. Their intense aroma and colour create a spectacular cloud while dissolving in water. In terms of size, Catfish Pop Up Bloody is available in 28 mm versions. These floating baits are perfectly suited to creating highly visible hook baits above the feed, or for building effective bait combinations.

PREDATOR Aroma Spray

Customisable flavour strength

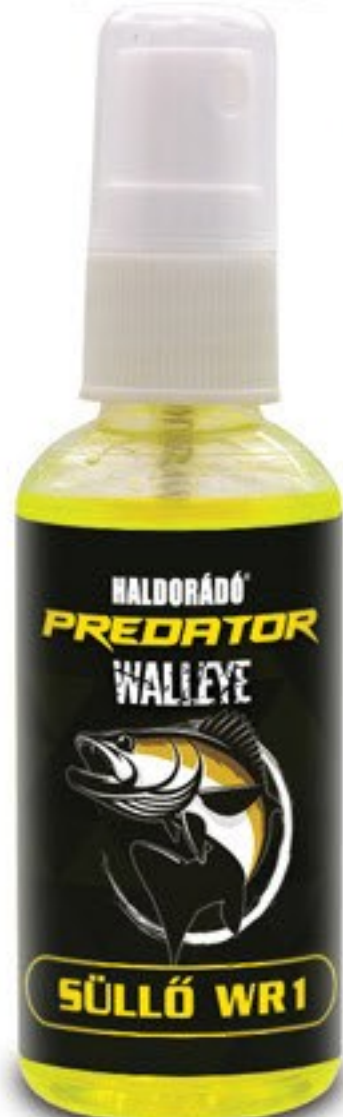

The PREDATOR predatory aroma spray spreads explosively in water with an extremely aggressive dispersion, guiding predators to the bait even from long distances. Moreover, in some versions the aroma not only stimulates the fish's sensory organs with attractive signals, but thanks to the added, 100% environmentally friendly fluorescent components, it also draws predators with a spectacular visual effect. The pump spray can be applied directly onto live or dead baitfish, fish pieces, worms, leeches, maggots, and artificial lures (especially recommended for soft plastic lures), significantly increasing their attractiveness, even multiple times over. This intense formula provokes those confident, powerful strikes we are always waiting for!

Haldorádó Silver Carp Program

by Sipi

Silver carp fishing is becoming increasingly popular among anglers, so in addition to attractants we also strive to develop new tools that make targeting plankton-feeding fish easier. Whether it's traditional bottom fishing or tablet-based techniques, mid-water methods, or even modern float fishing with sensitive tip rods, almost everything can be found in our range.

LEGEND Groundbait

Just like the LEGEND bait family and aromas, the LEGEND Groundbait series was also developed primarily for catching larger carp. The groundbait family, consisting of nine active ingredients, is largely made up of the LEGEND groundbaits that have been well proven and part of our range for many years. Most of these have enjoyed uninterrupted success for 10–15 years. We refreshed them, slightly renewed them, enriched them with modern binding agents, but most importantly, we adapted them to meet the constantly changing demands of feeder fishing.

Legend Pellets

Amerika, USA

Ázsia, Japán

Afrika, Dél-afrikai Köztársaság

Ausztrália

Európa, Spanyolország

The most popular baits of the Haldorádó product range are now available as Legend Pellets. We selected the most effective flavors and colors, in the most frequently used sizes. For modern feeder fishing, pop-up and wafter baits are indispensable, so Haldorádó's legendary baits are available in all three versions!

The best Haldorádó baits

LEGEND PELLET Wafter

These are moderately buoyant (wafter) baits that, even with a 7–10 mm bait screw or a medium-sized hook, already settle to the bottom, yet remain a feather-light, easily inhaled, highly attractive mouthful. Once the bait reaches the water, it immediately starts to dissolve. This dissolution is slow and even. In cold water it can last up to 5–6 hours, while above 20 °C it takes 1–2 hours, with the core remaining firm and stable throughout.

Moderately buoyant, dissolving bait

LEGEND PELLET Pop Up

Highly buoyant pop-up hookbaits that fans of the product family have been waiting for a long time. These are the highest buoyancy baits within the LEGEND PELLET range. They are perfectly suitable for use on their own as a critically balanced or fully popped-up presentation, but are also highly recommended for balancing and lifting other hookbaits. LEGEND PELLET Pop Up hookbaits have the firmest texture among the LEGEND PELLET baits. This type does not soften at all, does not become gelatinous on the surface, and does not dissolve – it can withstand several days in the water.

Highly buoyant, non-dissolving hookbait

TORNADO

METHOD MIX

The Tornado Method Mix is a specially formulated groundbait developed specifically for method feeder anglers. The attractants perfectly match the already well-known Tornado product family. Its special feature is that the package contains finely ground, highly lifting method mixes, and in addition we include some colorful, flavored micro pellets. This allows the angler to dose and adjust the mix to the base according to the fishes' feeding activity.

TORNADO Method

The Tornado bait is an optimized version specifically developed for method fishing, releasing its colorants and attractants in the same way as its famous predecessor. Each jar contains 6 mm and 8 mm pellets in the well-known Tornado flavors. Thanks to the bait sting presentation, it also allows anglers using finer method techniques to take advantage of the benefits of "smoke" baits.

TORNADO Wafter

The so-called "smoke" or "bloody" hookbaits are extremely popular. Tornado Wafter delivers exactly what anglers expect from it, while its unique shape eliminates the suspicion of even the wariest fish. The 12 mm size is ideal: not too large, not too small, and it effectively selects mainly carp.

TORNADO Pop Up XL

The TORNADO Pop Up XL is a truly high-buoyancy hookbait, which makes it perfectly suitable for use on its own as a critically balanced or pop-up presentation, or, more commonly, for balancing and lifting other hookbaits. Its size is 15 mm. Our experience has shown that this size is exactly what is needed to meet the above-mentioned expectations perfectly.

TORNADO Activator Spray

Available in flavours and colours matching the Tornado baits, the Tornado Activator Spray can be used to turn any bait whether pellets, boilies, or corn into a highly attractive and eye-catching offering. This aroma adheres to the bait and, once in the water, continuously creates a spectacular "smoke" effect while releasing the attractants with high intensity. 2-3 sprays on the bait or onto the filled feeder are more than sufficient; the intense aroma can be detected immediately!

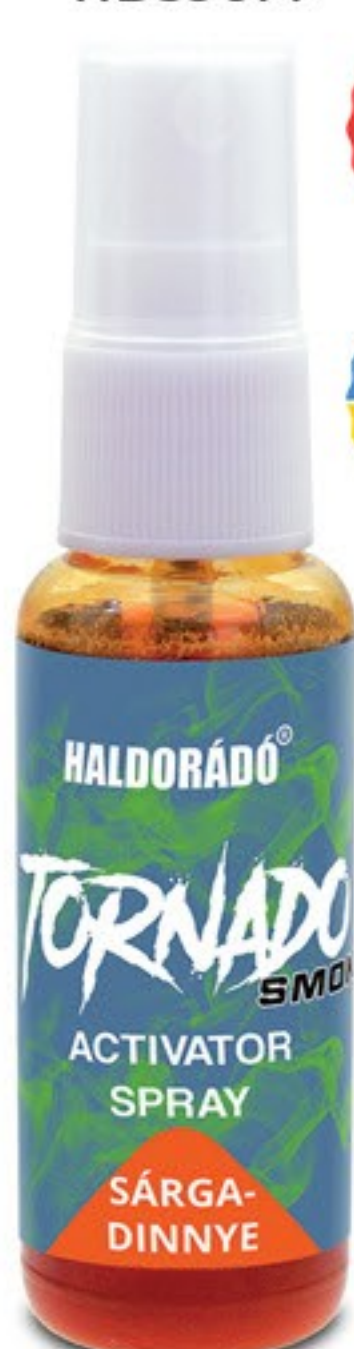

Intensive flavour and colour boost

TORNADO Activator Gel

The main image shows a smiling man in a blue jacket and cap holding a large, healthy carp. The background is a serene lake with green hills under a cloudy sky. An inset image in the bottom right corner shows a close-up of a hand holding a black feeder filled with brown bait, with a thick, red, gelatinous substance (the activator gel) being applied to the bait.

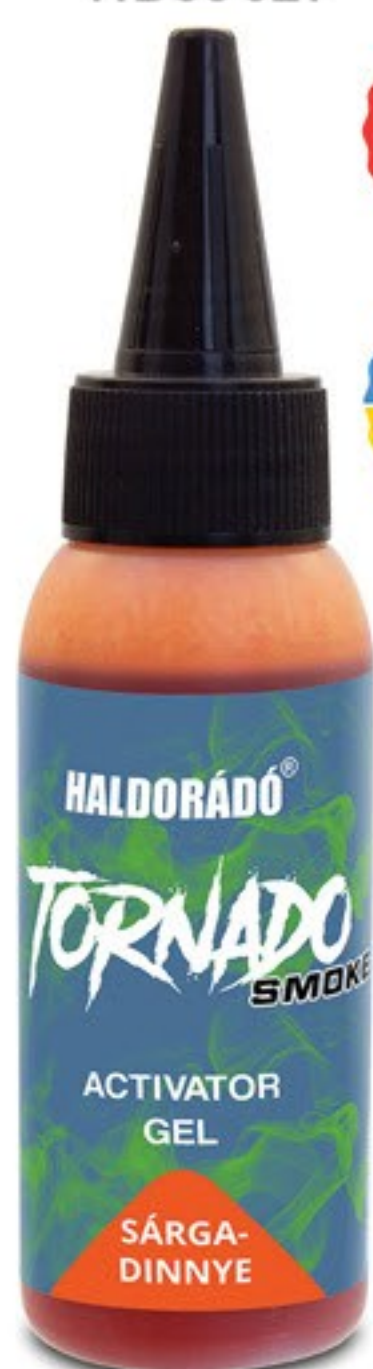

attention-grabbing

Excellent adhesion, concentrated

The Tornado Activator Gel is available in the same flavours and colours as the Tornado baits. It is a high-density, highly adhesive, bite-stimulating additive, primarily developed for intensively flavouring filled method feeders and PVA sticks. Thanks to its thick, sticky consistency, the treated surface remains concentrated directly on the bait or hookbait, continuously releasing attraction in its immediate vicinity, providing an unmistakable directional signal (especially) for carp. It is fully resistant to powerful, long-distance casts and the intense water impact associated with them.

4S Method Pellet Groundbait

The base of these groundbaits is the 4S Method Pellet Mix. These pellet blends have proven to be so successful that they work effectively on virtually every European water where carp are present. They select carp extremely well and reliably concentrate them on the spot, but their true strength is shown in method feeder competitions. In addition to the pellet mixes, it was also necessary to develop perfectly matching groundbaits, hookbaits and liquid aromas. The tests were carried out simultaneously in three different countries. From more than 20 different variants, the four most effective versions were ultimately selected and included in the range.

Jointly developed for method feeder fishing

4S METHOD PELLET MIX

The 4S Method Pellet Mix is a product family whose base ingredients are the well-known Aqua Garant and Coppens pellets. Its preparation is simple: you only need to add the appropriate amount of water, mix it thoroughly, and after a few minutes it is already suitable for filling the method feeder. All versions are natural and free from added aromas. These can, of course, be flavoured and scented later, adjusted to the fishes' preferences.

Proper bait material at the right time

4S Method Pellet Wafter

The complete 4S Method Pellet product family consists of elements that all serve targeted method feeder fishing.

The "system" is only complete when, alongside feed pellets, groundbaits and highly effective aromas, hookbaits also form part of it. Here it is: the 4S Method Pellet Wafter in 6 and 8 mm sizes!

Developed jointly by anglers from three countries for targeted method feeder fishing

4S Method Pellet COMPETITION

competitions!

Ready for the toughest

The entire 4S Method Pellet range has been specifically optimized for method feeder fishing, making it just as suitable for competition-style method fishing. Introducing the 4S Method Pellet COMPETITION 5 mm hookbait range! These 5 mm, moderately buoyant, slow-dissolving, uniquely shaped hookbaits are available in the same four flavours and colours as the other 4Season baits. Thanks to their shape and design, they can be mounted very easily and securely on a bait spike. The recess in the centre of the bait is designed to ensure that the bait spike locks firmly in place, preventing the hookbait from slipping off.

4S Method Pellet Aqua Wafter

The 4S Method Pellet Aqua Wafter product range consists of three members. It is available in Uni, Classic, as well as Uni & Classic versions. These matte baits do not attract attention with their colours quite the opposite. They blend perfectly into the pellet cup in the feeder basket, allowing fish to pick them up without suspicion. In this case, the most eye-catching element is the bait itself.

4S Method Pellet Spray and Gel

Spray-type aromas are among the most popular in method feeder fishing, as their use offers great versatility. With their help, almost any natural groundbait – such as 4S Method Pellet Mix and Groundbait – can be flavored to our liking.

Gel-type aromas are denser additives than their spray counterparts. Their effect lasts longer, so they also keep the later-arriving fish interested. Their use perfectly complements the 4S Method Pellet Spray, because their combined application ensures that both fast- and slow-acting attractants are present around our feeder.

Effective aromas, even longer-lasting

Top Method Feeder

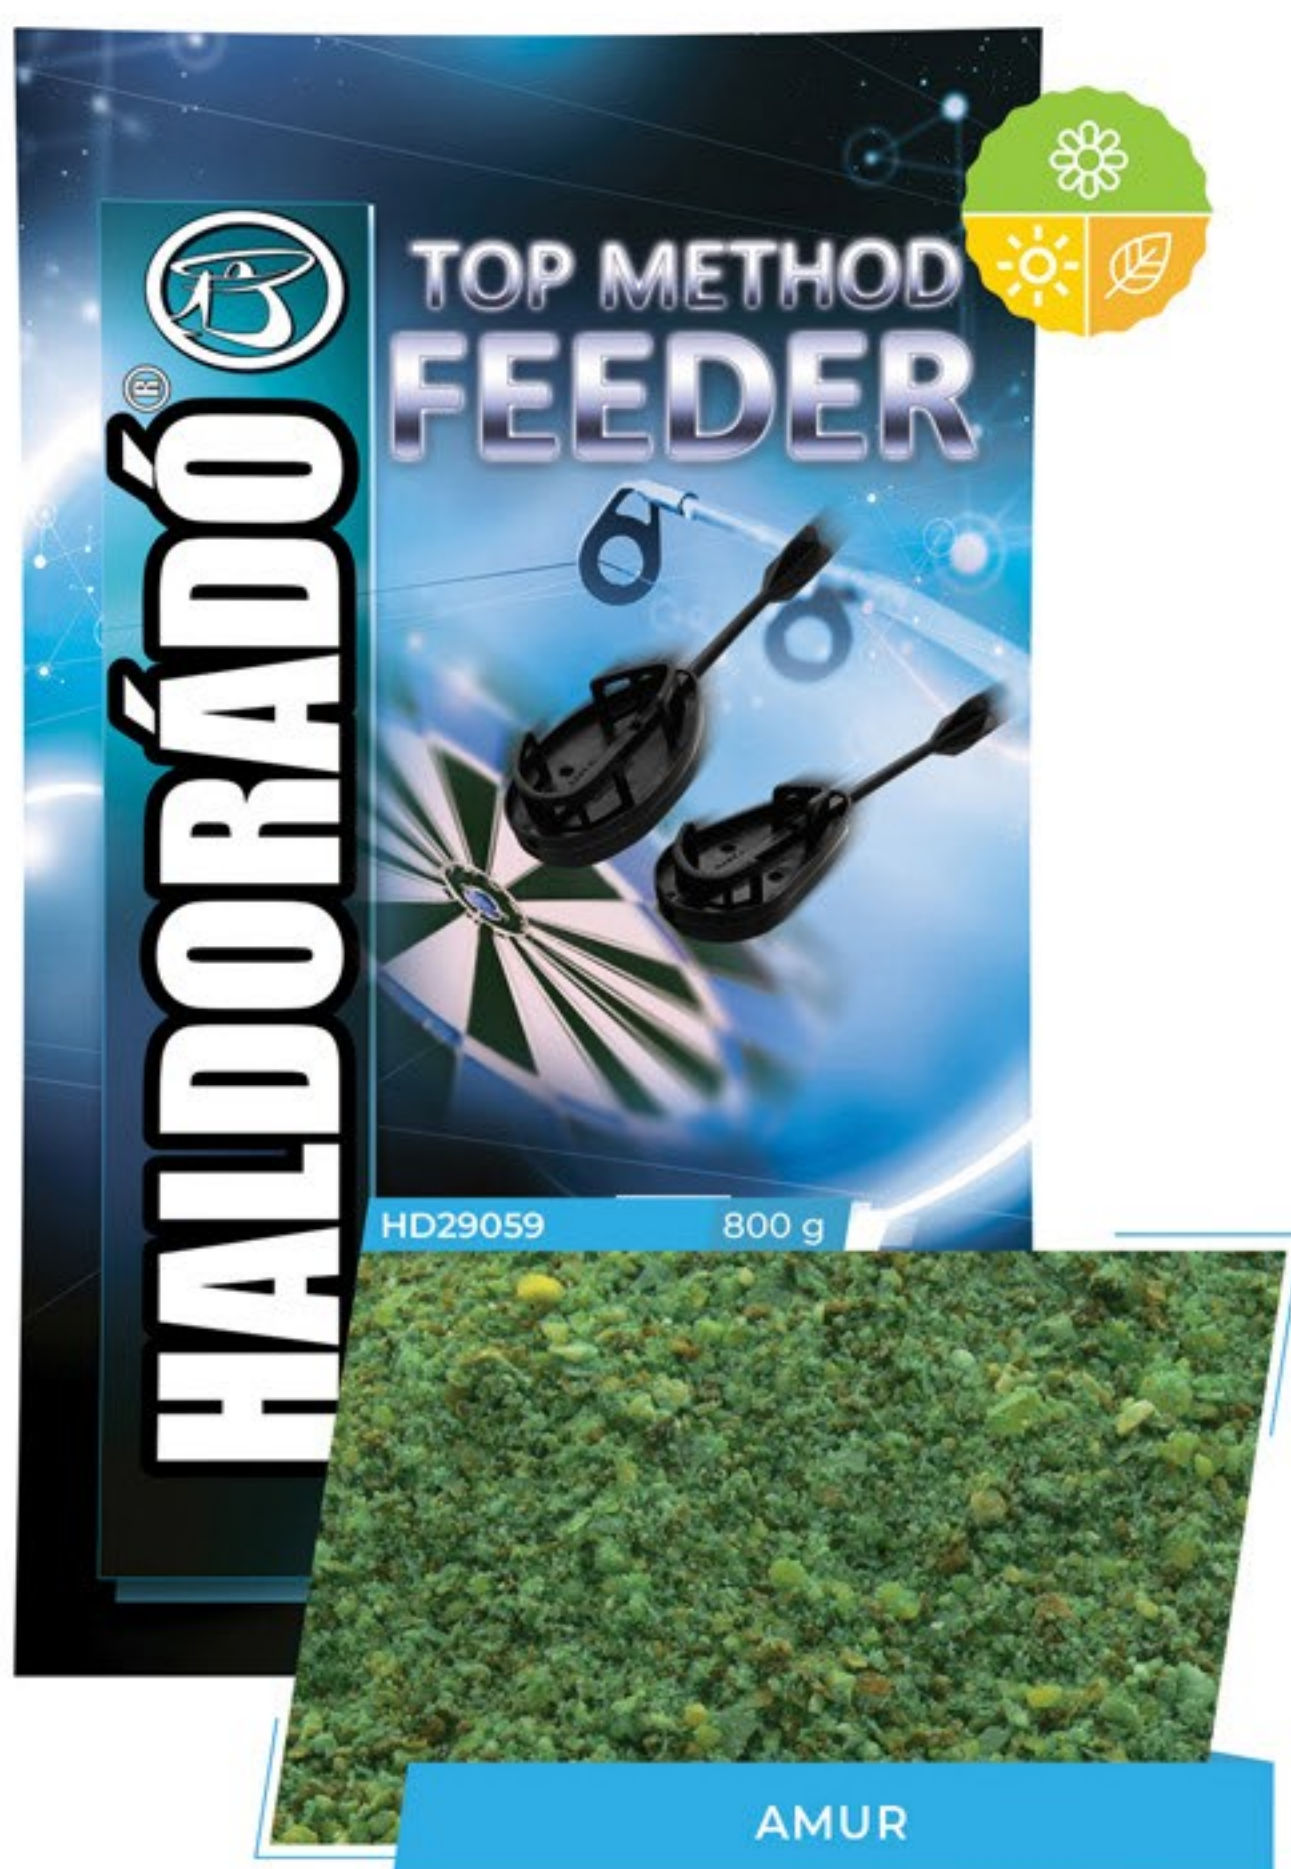

The Top Method Feeder groundbaits represented the pinnacle of method groundbaits in the Haldorádó range for many years, until the rise of pellets gradually pushed them out of the spotlight. In 2024, however, we relaunched this product family with three brand-new versions, each developed in a targeted way to catch specific fish species, and all of them capable of standing their ground in any competition when combined with pellet mixes. All versions feature a powder-fine texture and are packed with rich nutritional values, making them truly irresistible for the chosen target species.

Top Method Feeder Pellet Box

Optimised pellet mixes for each fish species

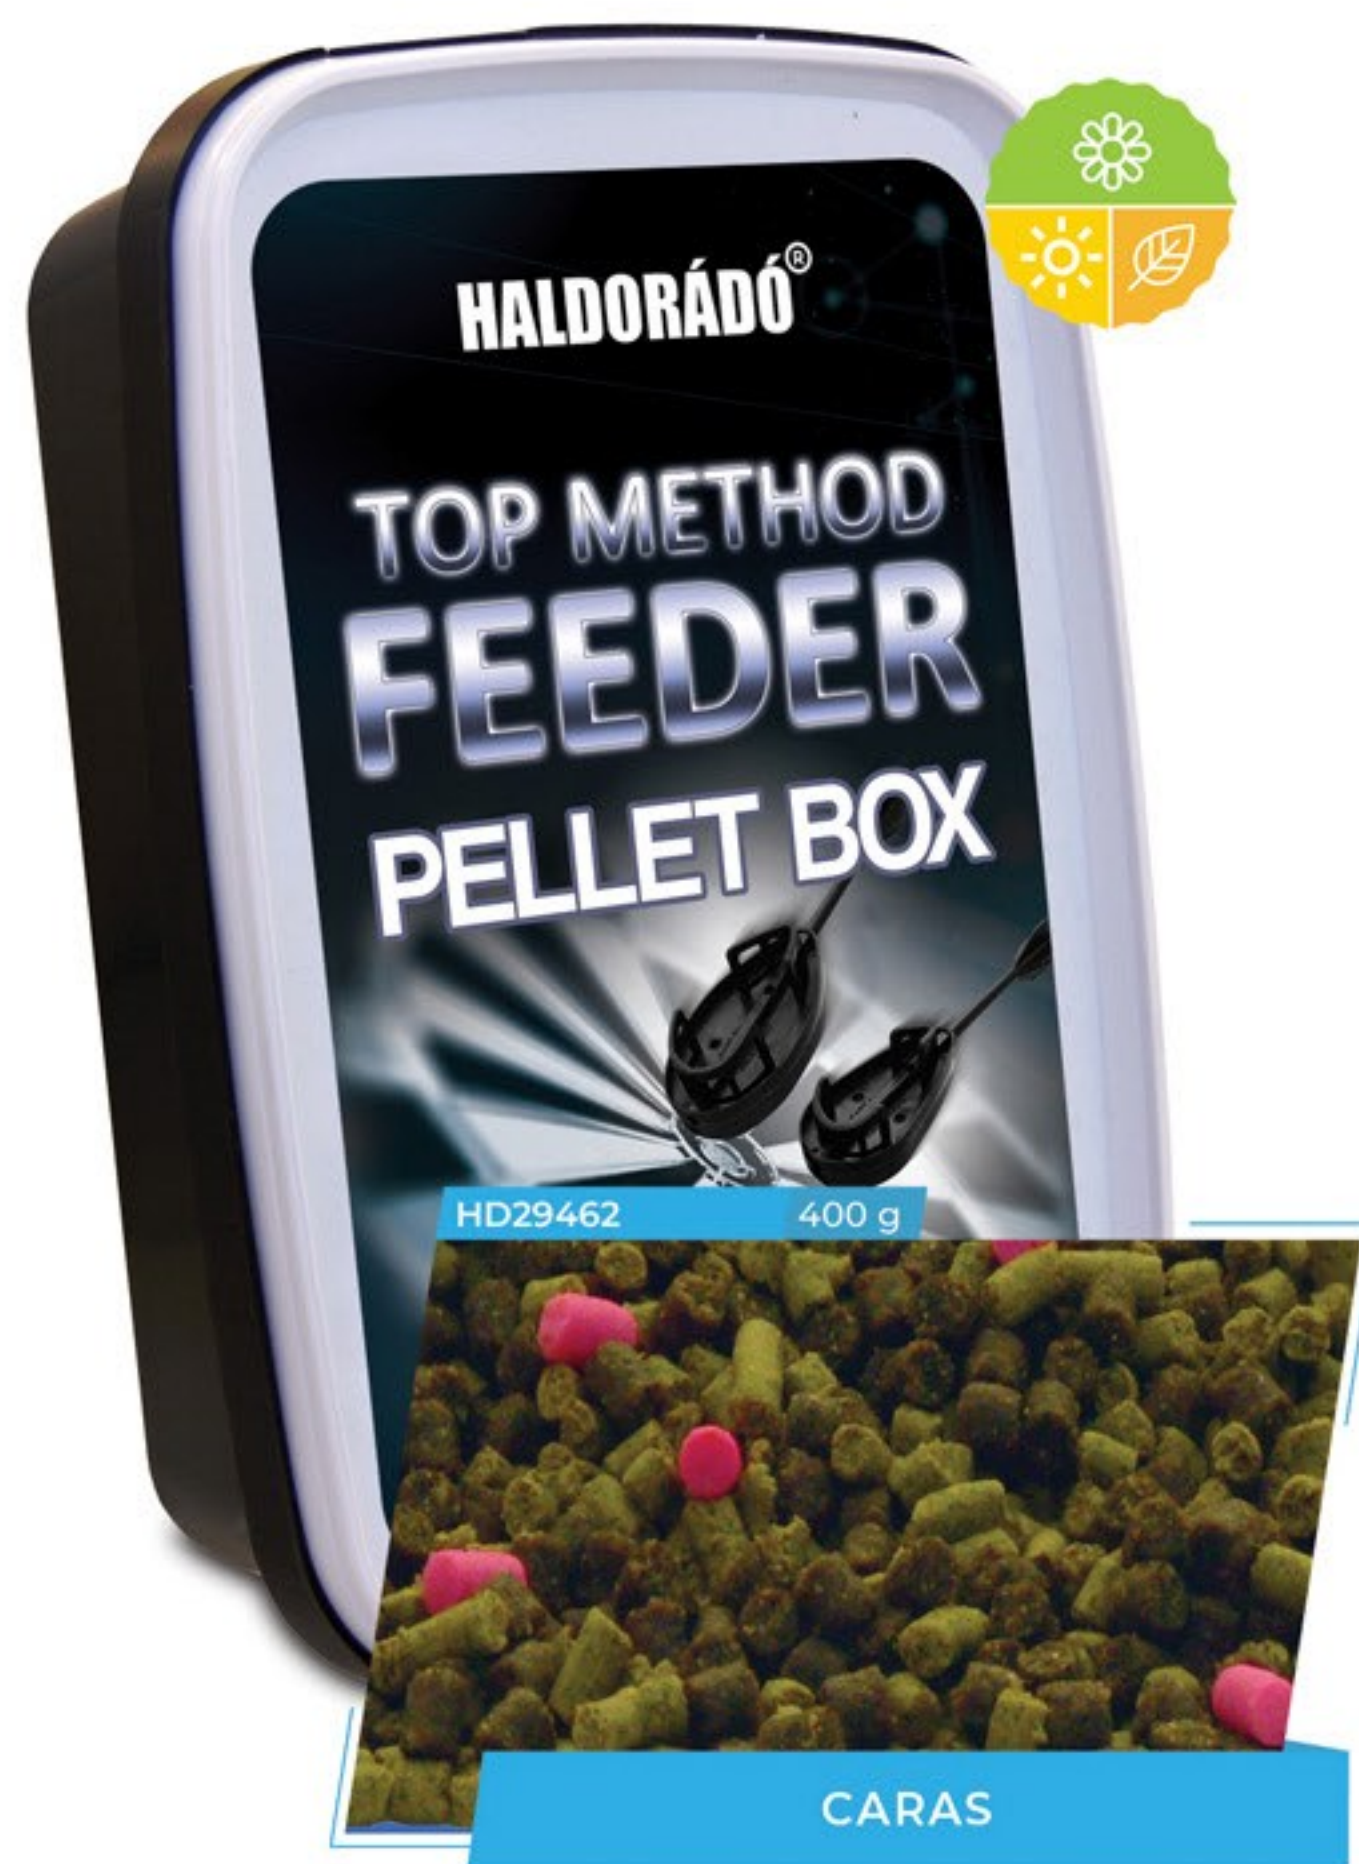

The members of the Top Method Feeder groundbait family, relaunched in 2024, are designed specifically for targeting certain fish species. However, in the world of method fishing dominated by pellets, we wanted to include pellet mixes in the product range whose flavour, aroma and character perfectly match the groundbait they are named after.

N-Butyric Groundbait

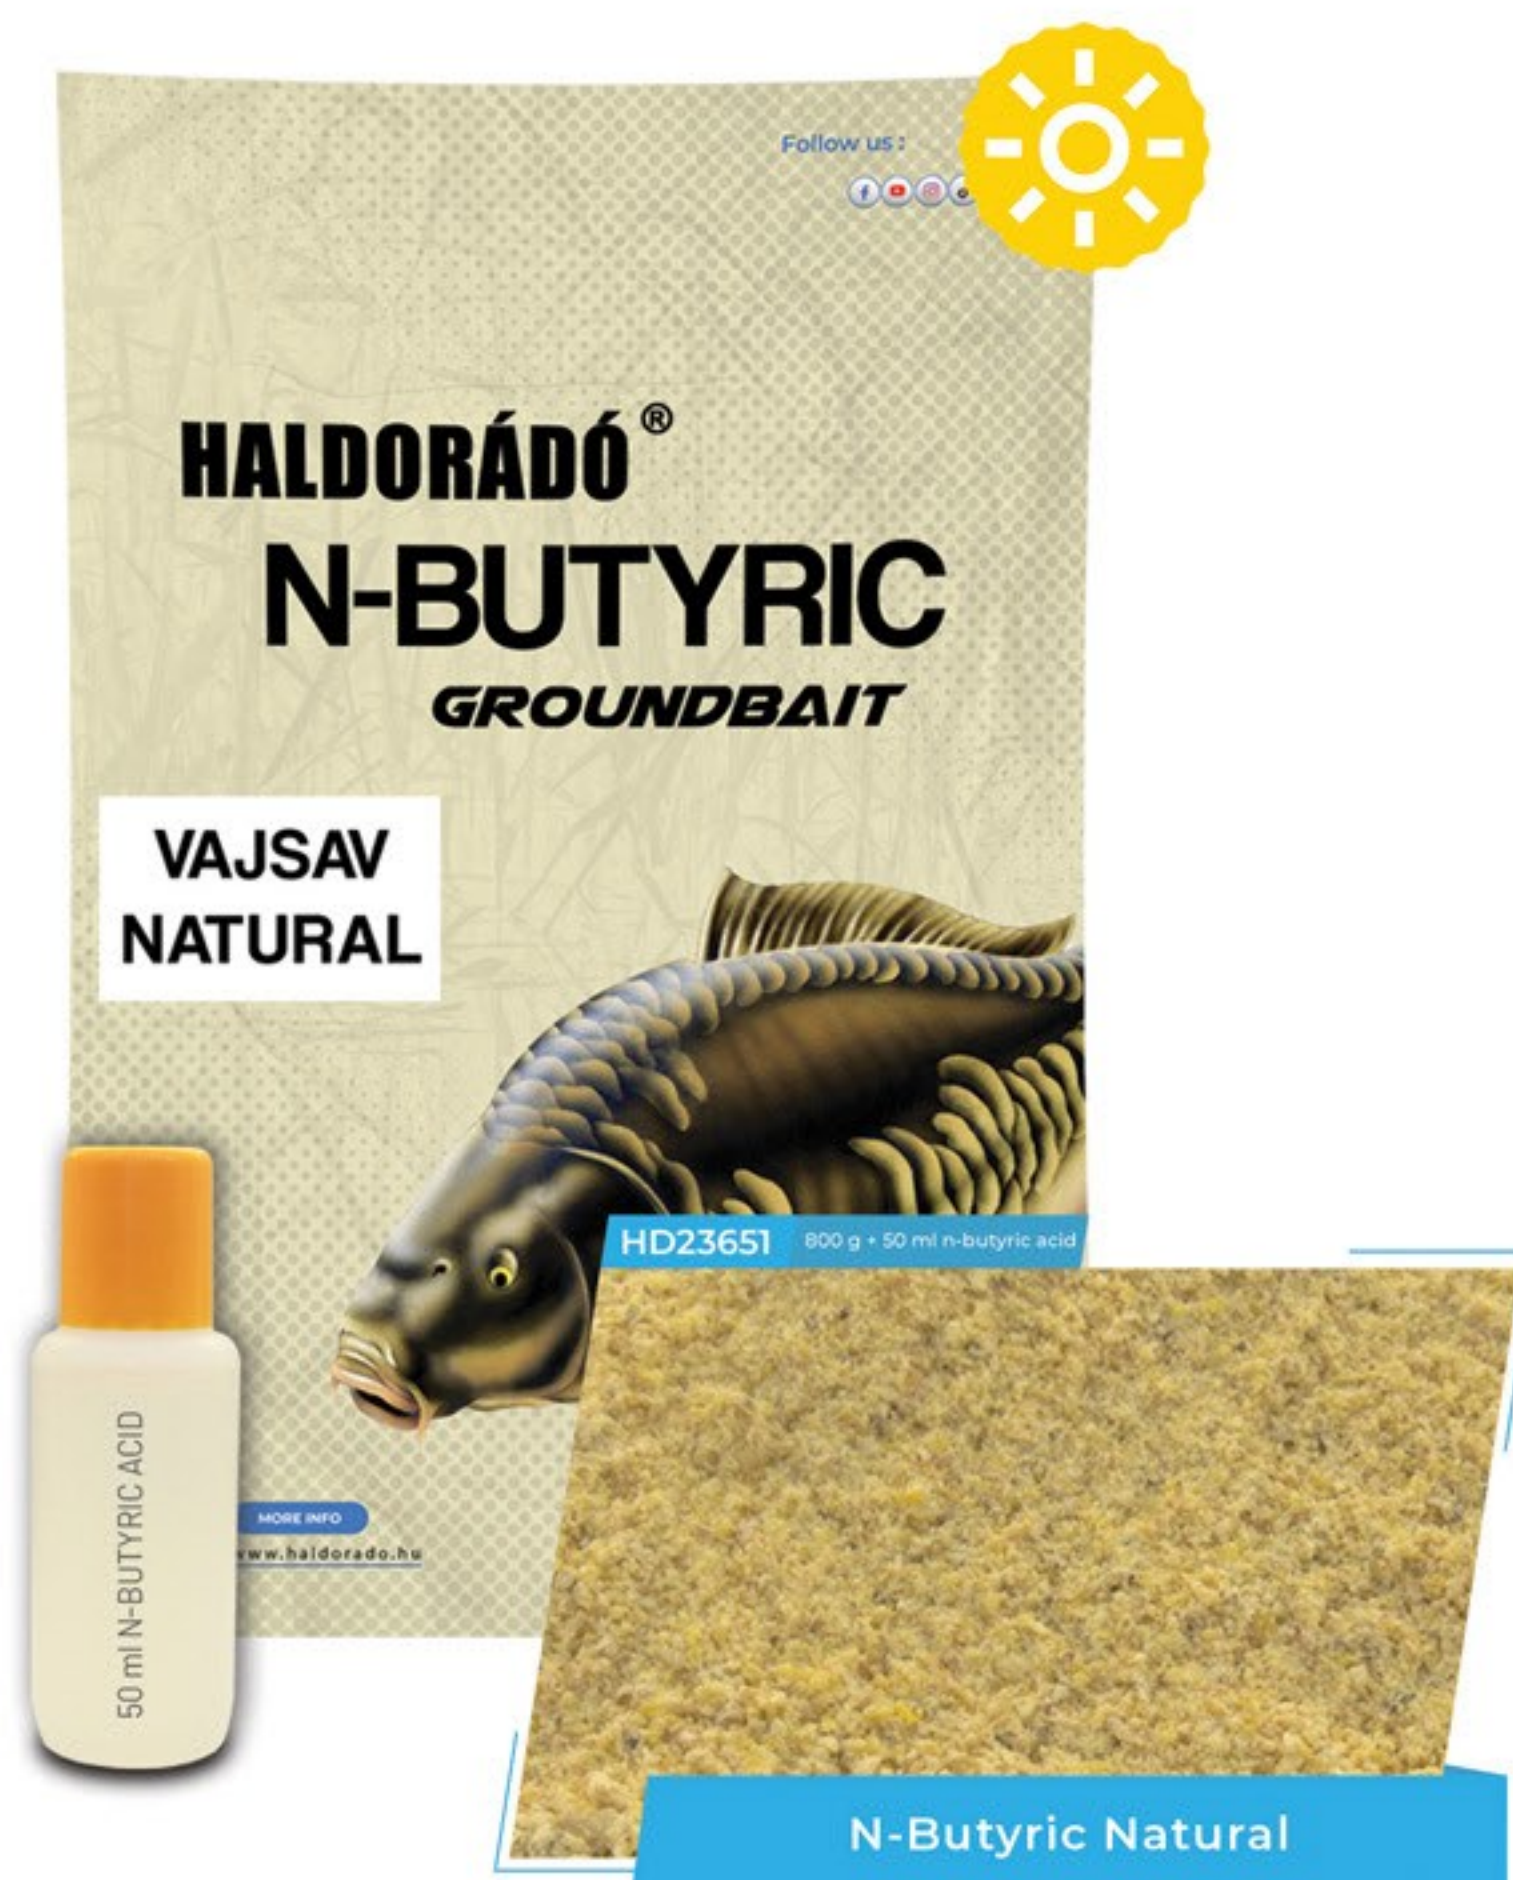

Butyric acid and groundbait master combination

The Haldorádó N-Butyric Groundbait is made from corn derivatives processed in various ways. It features a very high carbohydrate content, mixed particle size, fast dissolution and rich aroma. Just like baits, these groundbaits perform best in already stable, warmer water, whether targeting carp or specifically grass carp. A special feature of the package is the included 50 ml concentrated butyric acid, which when mixed into the dry groundbait with (+300 ml water) helps achieve the desired effect. In terms of application, it can be offered effectively both with a cage feeder and in a method feeder.

Colour: purple

N-Butyric Pop Up Method

N-Butyric flavoured baits are effective on their own, but in order to increase catch rates we paired them with already proven, well-known flavours. We also renewed this product range in terms of colour combinations, as the flavoured versions received double colouring, which we specifically optimised for warmed-up, murky waters.

N-Butyric Spray

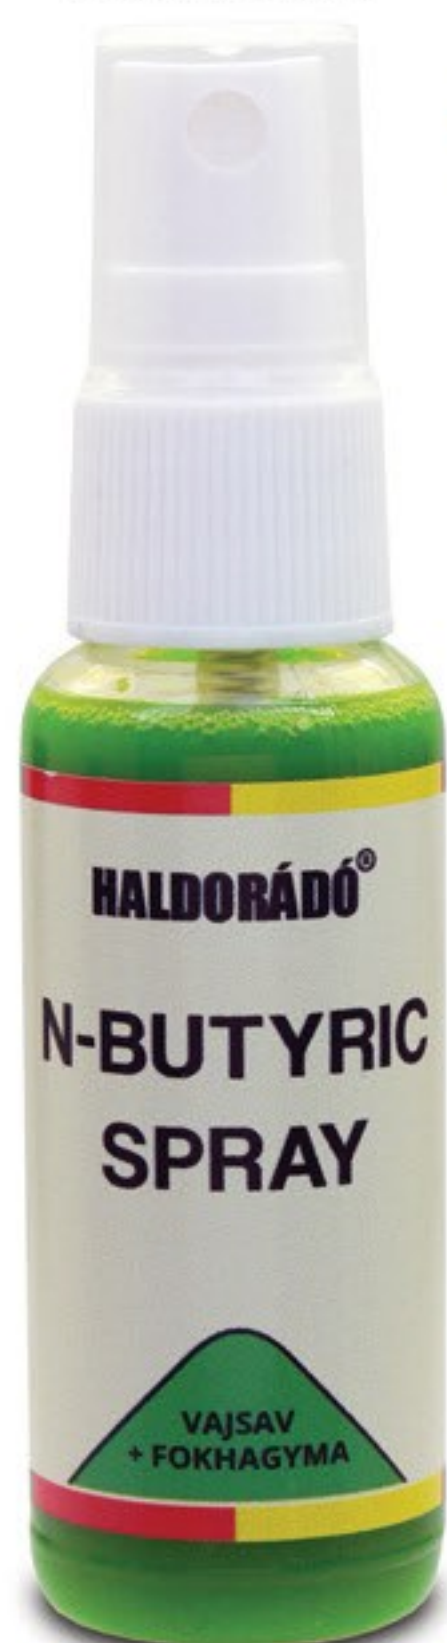

The N-Butyric Spray, similarly to the TORNADO Activator Spray, is supplied in a small pump bottle. Its use is very simple: just spray it onto the filled feeder or directly onto the hookbait, thereby multiplying its attraction. It is clearly recommended for summer, warm-water fishing, whether targeting carp or grass carp.

Silver Carp groundbaits

silver carp fishing

Silver carp fishing is developing at an astonishing pace, therefore from 2025 our range of silver carp groundbaits will expand significantly. In addition to the already available, well-established silver carp tablet baits, these new products will also be available in different flavours and colours. All of them feature excellent clouding properties, good binding ability, yet dissolve quickly. They are fine-grained groundbaits that can be effectively introduced either with traditional bottom-fishing techniques or with float methods. The sixth member of the range, China Style, is inspired by traditional Chinese silver carp baits. This mix stands out from the rest in terms of composition, ingredient ratios and mode of action. In every respect, it is a special groundbait that has been specifically optimized for pole-rod silver carp fishing.

BIG RIVER

The time has come to introduce a groundbait range developed specifically for river fishing, thus the Haldorádó Big River was born. A key objective was to provide anglers with highly nutritious, complex mixes that only require the addition of water. Once the bags are opened, it is immediately clear that these mixes are rich in ingredients and nothing has been spared.

River fishing? Then Big River!

Base Mix

The members of the Haldorádó Base Mix family are large-pack, great-value groundbaits. All of them are base mixes that work excellently both in still waters and rivers. They are primarily recommended for venues where a large amount of groundbait is needed to attract fish to the fishing spot and keep them there.

Abundant feeding, large packaging, great value!

BlendeX Serum Ghost

The BlendeX Serum Ghost – just like its predecessor – makes it possible to use two different flavour aromas together; in fact, the flavours themselves remain exactly the same as before. The only change is the content formulation: the new aromas deliver even more powerful attractors, appetite stimulants, and pleasant flavours, while the Ghost now also creates a striking visual attraction thanks to its spectacular clouding effect.

More intense aroma and extra visual effect

Groundbaits effective all year round

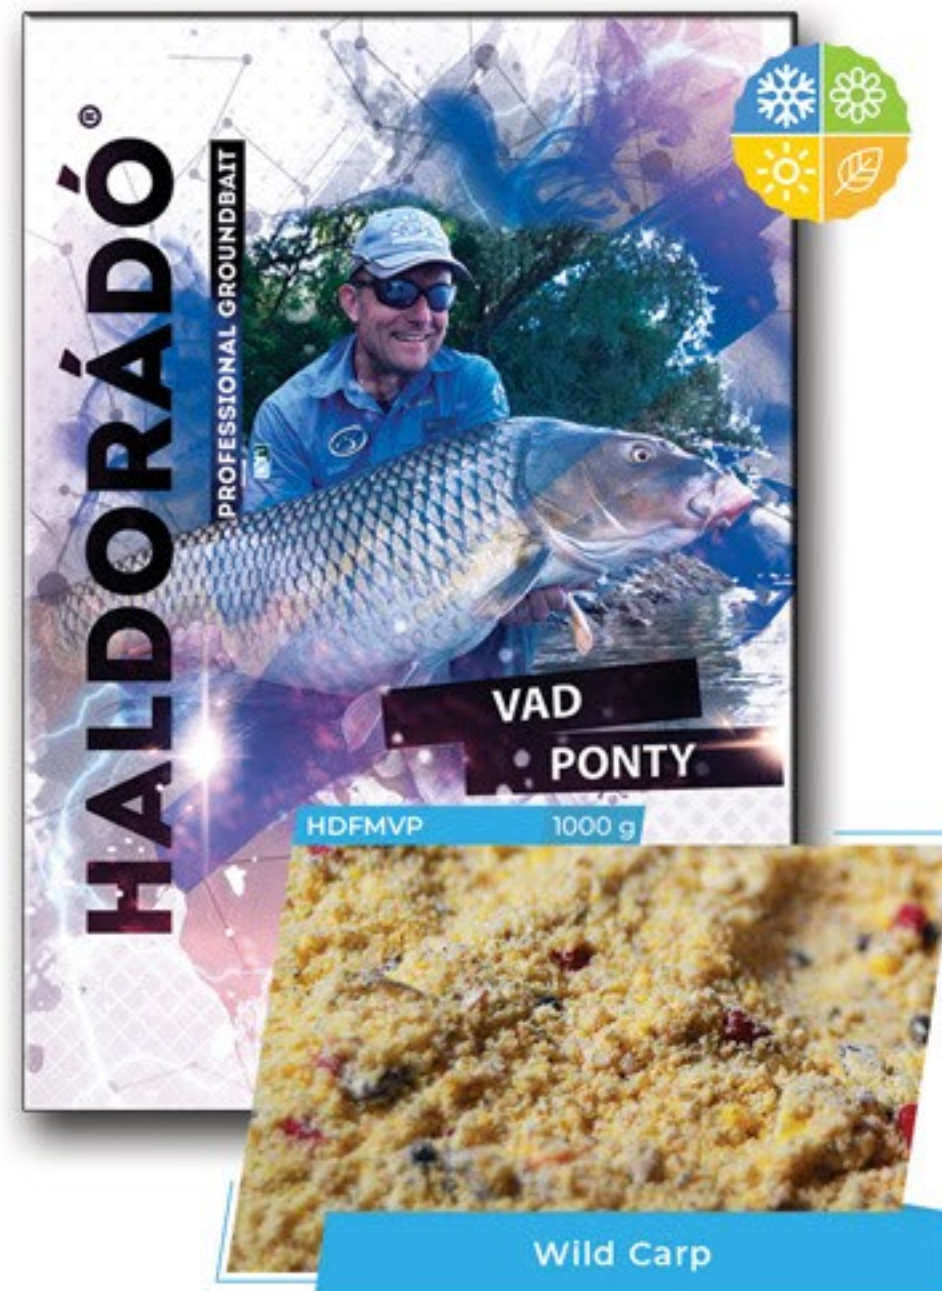

The mixes are exceptionally rich, high in nutritional value, and feature extremely intense aromas. They are made exclusively from guaranteed fresh ingredients, which have proven their outstanding effectiveness in targeted big-fish angling at any time of the year. Each mix has been formulated to be effective even in small quantities, including a single feeder basket portion. Therefore, they are especially recommended for both traditional bottom fishing and modern feeder techniques.

FLUO ENERGY

groundbaits

The Haldorádó Fluo Energy groundbait range attracts attention not only with its specially selected base ingredients and unique flavour-colour harmony, but also with its explosive appearance. When mixed and ready to use, its strikingly intense colour becomes even more eye-catching, as it dissolves slowly yet continuously in the water, creating a huge, colourful cloud.

Pellet Bomb

NEW
2026

The Pellet Bomb is a cylindrical attractor made from pressed pellets, designed in the style of a busa tablet, with a drilled centre. Thanks to this central hole, it can be easily mounted onto terminal tackle prepared for this purpose. With this innovative technology, fishing becomes simpler than ever before. The range includes several different compositions, available in both fast- and slow-dissolving versions.

Pellet fishing made easy!

Carp Micro Pellets

From 2024, the renewed product family with an improved recipe is available under the name Carp Micro Pellet. Even better quality, more vivid colours and more attractive flavours – all at an unchanged price. Can be used to upgrade traditional groundbaits, or as an additive. Suitable for use on its own in a method or cage feeder. Also works perfectly in PVA bags or mesh, mixed with crushed boilies, making it ideal even for big carp fishing. It can also be spombed.

*Ideal for filling method feeders
Excellent additive for groundbait or pellets*

Pellet Pack by Gábor Döme

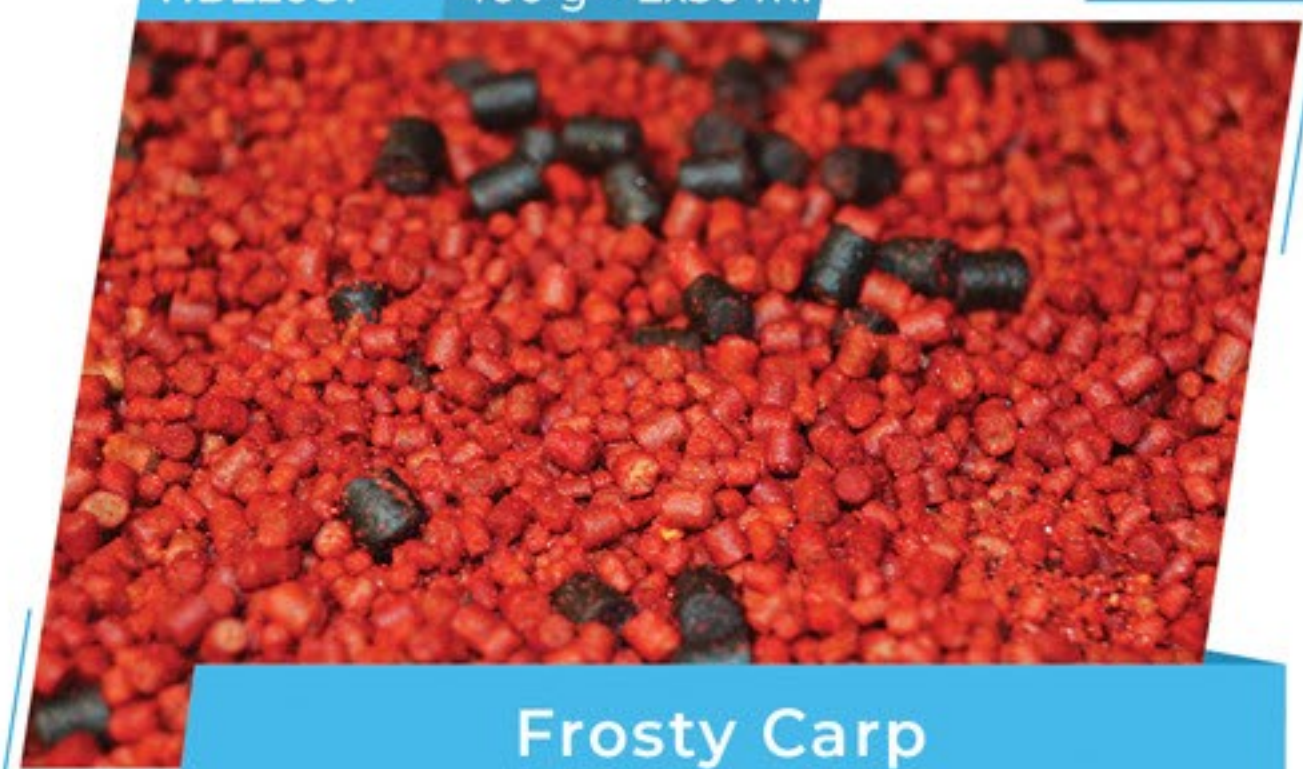

The renewed Pellet Pack by Gábor Döme is no longer sold in a cardboard box, but in a resealable plastic container. This allows the pre-mixed bait to stay fresh for a longer time, and after emptying it, the box can be reused. Each version contains 400 grams of mixed pellets in 2, 3 and 4 mm sizes, as well as a 50 ml bottle of Pellet Juice inside the box. In the Icy carp version, in addition to the Pellet Juice, a 50 ml CSL Tuning – Icy carp aroma is also included.

Even higher quality, new format

Plant-based feeding pellets

Pellets of plant origin are a truly natural treat for all species of coarse fish, but they are primarily used in carp and grass carp fishing. During summer "torpedo hunts," they can be used on their own, without mixing them into groundbait blends.

4 BODY Wafter

The special feature of the 4 Body Wafers is that the tube contains four different bait shapes that are commonly used in carp fishing. These are 8 and 10 mm pellets with excellent buoyancy, making them suitable for both method feeder fishing and traditional carp fishing, even with smaller hooks, just like identically flavoured Ronnie Rig pop-up boilies. In addition to the classic dumbbell shape, baits divided into four, three and two parts can also be mounted on a bait spike or bait screw, while the two-part version can also be used with a bait ring.

Ronnie Rig Pop Up 10, 12 and 14 mm

All Ronnie Rig Pop Up hookbaits have been optimized for one of the most popular bait presentations. They are double-coloured, highly visible and extremely flavourful, with significantly stronger aroma than usual, and they also feature outstanding buoyancy. The larger sizes are specifically designed for targeting cautious big carp and grass carp. These pop-ups are suitable for lightening large bait combinations, but they can also be used effectively on their own. The striking colours and flavour combinations provide effective catching opportunities in any situation. If you want a perfect presentation, we recommend pairing them with the ready-made Ronnie Rigs available in our range.

Krill Force PVA Bag Liquid

Modern carp fishing is unimaginable without the PVA Bag method. The Krill Force PVA Bag Mix is already a high-quality blend, but with these liquid aromas it can be made even faster acting and more intensive. The product family consists of three versions, which differ only slightly in flavour. Krill Natur is a completely natural, unflavoured version. Hot Spicy is flavoured with a spicy spice mix, while Indian Spice is made with a special Indian, mildly spicy spice blend.

MAX MOTION Boilie

Long Life 16, 20, 24 and 30 mm

size range

The MAX MOTION Boilie Long Life products are premium-quality boilies suitable for both baiting and hookbait use, in the "Long Life", i.e. extended-durability version. In the water, attractants are released continuously from them, while they hardly absorb, or do not absorb at all, unpleasant bottom-mud smells, and they wait for the later-arriving larger carp as well. The LONG LIFE boilies are available in 16 mm, 20 mm, 24 mm and 30 mm sizes. In spring and during cold-water periods we recommend using the smaller boilies, then as water temperature rises and the fishes' appetite increases, the size of the boilies used can also be increased.

Effective boilies with a wide flavour and

MAX MOTION Boilie Premium Soluble 24 mm

The MAX MOTION Boilie Premium Soluble 24 mm balls dissolve in approximately 1.5–3 hours, depending on water temperature. During dissolution, they release an intensive flavour and aroma. They are primarily designed for spot pre-baiting and pre-feeding, without completely filling up the fish, but when carp are feeding cautiously and carefully, they can also be extremely effective as hookbaits, since their texture allows them to be mounted on a hair rig and used directly as bait.

as a hookbait

MAX MOTION Boilie Hard Hook Wafter 16, 20 and 24, 30 mm

from small fish

The MAX MOTION Boilie Hard Hook Wafter is a hardened bait produced with a special lightening process, specifically designed to withstand prolonged attacks from nuisance silver fish or even small catfish. It retains its rig compatibility for a long time, while its aroma release is dynamic and long-lasting, giving it outstanding attention-grabbing properties. Within the Hard Hook Wafter product family, two different pack versions are available. One version contains 16 and 20 mm baits, while the other includes 24 and 30 mm sizes. Thanks to this, it is possible to adapt perfectly to both the level of nuisance fish activity and the size of the target fish.

MAX MOTION Boilie Dipped 20 mm

The MAX MOTION Boilie Dipped 20 mm is a truly flavour-intensive, highly attractive hook bait. It is soaked in a liquid dip (flavour and aroma), thanks to which the bait instantly starts to stimulate feeding once it enters the water, quickly attracting carp moving in the area, as it begins to work immediately. Despite being soaked in dip and having a softer texture, the bait does not fall apart. It remains sufficiently hard and stable on the hair rig!

A real dessert for big carpi

MAX MOTION Boilie Pop Up 16, 20 mm

The size of the cooked Pop Up hook baits has been adjusted to match the increased size of the Max Motion boilies, so in addition to the 16 mm size, 20 mm hook baits are also available in the range. This floating hook bait type retains its buoyancy for a long time under all conditions, ensuring excellent visibility on the feed and preventing it from sinking into the silt or aquatic vegetation. It is a "Long Life", i.e. cooked hook bait, therefore it does not dissolve in water and does not lose its size.

Increased buoyancy, better visibility

MAX MOTION Boilie Balanced 20 mm

MAX MOTION Boilie Balanced 20 mm is a large-sized balanced (Balanced) bait, essentially a moderately buoyant wafter. It is highly visible and flavour-rich. When used with an average size 4 hook, the hook sinks to the bottom while only the bait mounted on the hair rig slightly lifts off the lakebed. Thanks to this precisely balanced setup, even the smallest suction is enough for the bait to enter the fish's mouth.

When fish are feeding cautiously, this bait can make the difference!

MAX MOTION PVA Bag Mix

From 2025, we are expanding our MAX MOTION product range with a very thoroughly and systematically developed PVA Bag Mix family. These mixed particle-size blends are made exclusively from ground ingredients, micro pellets, and crushed boilies that are guaranteed to sink even when dry. In addition to use with the PVA bag method, these mixes are also suitable for enriching big-carp groundbaits.

MAX MOTION Carp Paste

The Carp Paste can be pressed either onto the lead or directly onto the surface of the bait. It has excellent adhesion and releases its aroma over a long period, thus guaranteeing long-lasting attraction around the hookbait. The pastes are supplied ready to use in the pouch, so no preparation is required. They are available in seven different versions.

Carp Syrup

The Carp Syrup flavour range provides highly effective support for selective, big-fish fishing. The aroma is thick enough to be used for flavouring cooked seed mixes as well as boilies and pellets intended for feeding. As it is a 100% PVA-friendly product, it is also perfectly suitable for making stick mixes, allowing you to present your bait in an even more attractive way. The flavours are identical to those used in our boilies.

MONSTER Hard Boilie 24+

Tuned to the taste of the biggest fish!

From 2024, the MONSTER product range includes not only hookbaits but also boilies designed specifically for baiting. These 24 mm hard, cooked boilies can withstand at least 24–48 hours in the water, making them especially suitable for long-term baiting strategies. They are not only excellent for baiting but also work perfectly as hookbaits on their own or combined with MONSTER Pop Up baits.

MONSTER Pellet Box

The MONSTER Pellet Boxes contain additives which, despite their unpleasant "smell," deliver a very strong long-range attraction, especially for large carp. These smelly yet highly nutritious feeds are available in six different variants. In addition to the pellet mix, the boxes also include 100 ml of flavoured liquid, which is just enough to soften the pellets and prepare them for use.

MONSTER Magnum 20+

soluble and cooked baits

The MONSTER Magnum combines all the advantages of soluble and cooked baits, as it features a cooked core with a soluble outer layer. The inner core has a diameter of 14 mm, is balanced with cork granules, and is a cooked, non-soluble bait. The outer layer is 3 mm thick and gradually dissolves, continuously releasing attractive flavour components. By using it, we can avoid the bait washing out, as the inner cooked core can last up to 72 hours, while the dissolving time of the outer layer is 2–3 hours.

Combines the advantages of both

MONSTER Pop Up Method

MONSTER Pop Up baits are highly buoyant floating pop-ups that definitely require larger, thicker hooks and sturdy bait spikes. The reason is simple: these are not baits for small fish. The clear goal is to selectively target bigger fish, which require larger hooks for secure hooking. The jars contain 9 mm and 11 mm versions. The balls feature not only mixed flavours but also mixed colours, making them highly visible even on darker groundbait or pellet beds.

MONSTER Gel Booster

Big-carp flavours for boilie and feeder anglers

The flavour of the MONSTER product range, featuring a strong, spicy scent profile, is a PVA-friendly, thick liquid that is an excellent choice for both boilie and method feeder anglers. Its special feature is that this product is not just a flavour, but a blend of natural extracts rich in valuable nutrients and appetite stimulants.

Big Feed - C21 Carp Boilie

affordable price

Cooked feeding and hook boilies at an

The C21 Boilie offers an exciting and cost-effective innovation for dedicated big-carp anglers. These boilies are made from high-quality ingredients and are available in a 24 mm size, as well as in 0.7 kg and 2 kg packs, allowing effective baiting for both shorter and longer fishing sessions. An important and advantageous feature is that it is a “Long Life” cooked bait, which—depending on water temperature—can last up to 48 hours in the water and resists the nibbling of smaller fish, enabling it to wait for the later-arriving big carp.

Quatro Fluo Pop Up Boilies

4 colours and 4 flavours in one jar!

It is undeniable that floating or critically balanced "snowman" baits prove to be more effective than bottom baits in most fishing situations, so they should not be missing from any carp angler's tackle bag. In the Quatro jar, our customers will find four highly effective floating baits with different flavours: garlic, strawberry, squid, and pineapple.

Floating bait imitations

These rubber baits have properties that make them irresistible to carp and grass carp when presented correctly. They can also be used in waters full of bullheads and small fish, as these species cannot “chew them up” prematurely. Their excellent buoyancy and intense flavour / colour set these products apart from similar imitations. With a single piece, you can catch dozens of fish if you don't lose it. At the end of the session, it is advisable to put the bait back into the jar so it can recharge and absorb the unique aroma again. This way, even a small jar can be enough for an entire season!

Colour: mixed

Hookbait Tiger Nuts and Corns

Hookbait seeds are among the oldest baits, but that does not mean they are outdated. Quite the opposite!

These baits, frequently used when targeting large carp and grass carp, are now available in our range in new, modern versions. Flavoured or even vividly coloured tiger nuts can also be used as complementary hookbaits for boilie fishing, while corn kernels soaked in alcohol offer an effective alternative for both traditional carp fishing and grass carp fishing.

Hi-Vis Tiger

Spicy Peach	212 ml	Pineapple & Banana	212 ml	Big Carp	212 ml	Kiwi	212 ml	Mango	212 ml

Corn Tuning

Alongside the fine corn flavoured with special aromas, the mix also contains Mega Mais (extra-large “tooth-shaped” corn) and tiger nuts. This way, you can try up to three different hookbaits at the same time – all conveniently packed in a single jar!

Three different, aromatic buoyant hookbaits in one jar

Additives

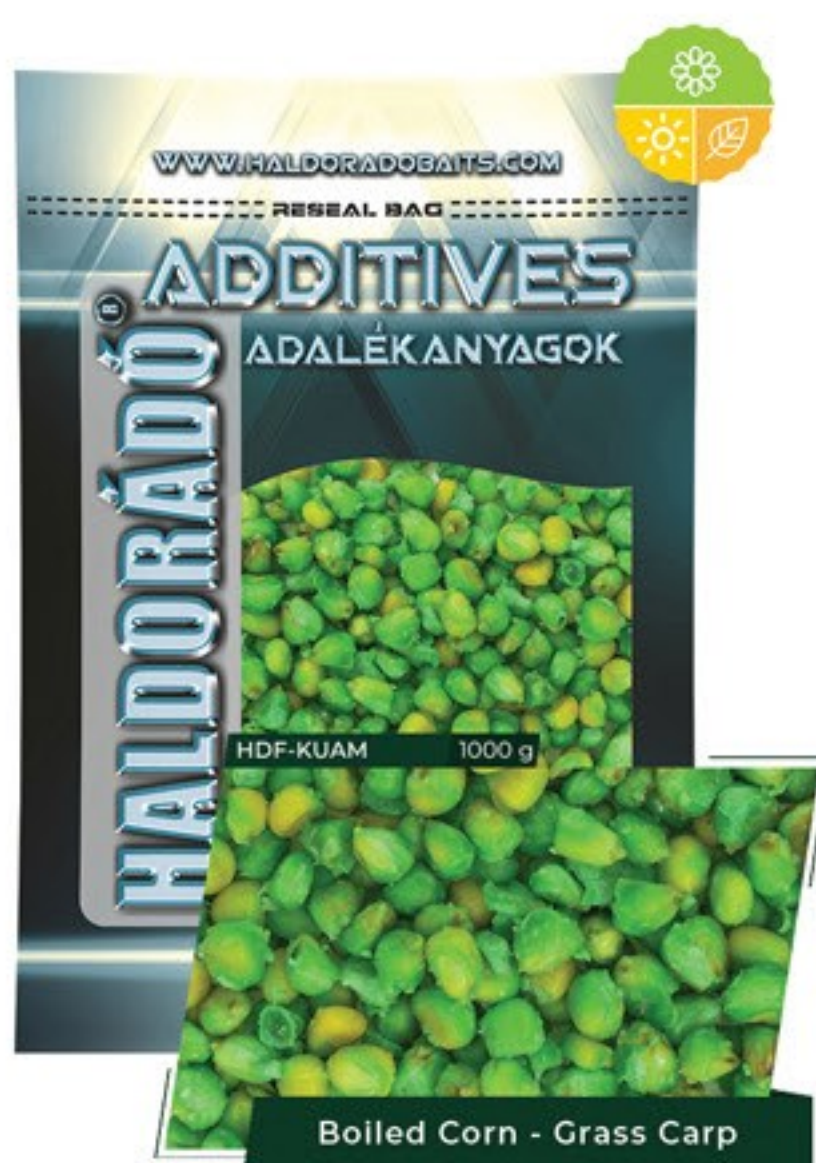

Lay the foundation for successful fishing!

Our wide range of additives includes cooked and even flavoured seeds used for building baited areas or enriching attractants, as well as fine-grained, powder-type specialties designed to enhance the nutritional value or flavour of boilies and groundbaits alike.
